

Professional Ethics of Members

Principles

- *A member of ECHAMP respects the Good Manufacturing Procedure (GMP) as applicable in the European Union and the individual Member States.*
- *The quality, safety and effectiveness of products offered to consumers must be evaluated under the specific procedures established by law.*
- *A member of ECHAMP seeks for a good relationship and cooperation with competent authorities and stakeholders for the benefit of homeopathy and anthroposophic medicine.*

Engagement

The members of ECHAMP:

- *assure that the manufacture, packing, labelling, distribution and import of homeopathic and anthroposophic medicinal products are carried out under legally required licenses;*
- *ensure that their products sold in the European Union are legally placed on the market;*
- *respect regulatory compliance;*
- *respect the Good Manufacturing Practices (GMP) and Good Distributing Practices (GDP) at the level required by the manufacturing or distributor license;*
- *participate actively in the evolution of ECHAMP;*

to make sure that the medicinal products marketed by ECHAMP members do not present risks to the health of consumers

Code of Ethics

The members are ready to collaborate with the EU institutions, national governments and competent authorities, in order to share their expertise and knowledge with respect to homeopathic and anthroposophic medicinal products.

The members support environmental standards.

The members support the development and the improvement of the industry through the installation of a culture which encourages quality, safety and good manufacturing practices.

The members comply with the current standards and norms of quality regarding production with the aim of improving public health.

Draft as adopted by the Board on Management on 25 September 2008
