# Public consultation on the structures of excise duties applied to alcohol and alcoholic beverages

Fields marked with \* are mandatory.

### **Background information**

Excise duties are indirect taxes on the sale or use of specific products. EU legislation on excise duties was largely prompted by the launch of the Single Market in 1993. As tax controls at the borders between Member States were abolished, common rules were needed to facilitate cross-border trade in certain products and to prevent competitive distortions. Therefore, EU legislation was adopted to ensure that excise duties for certain products (namely alcohol, tobacco and energy) were applied in the same way, and to the same products throughout the Single Market, and that Member States applied (at least) a minimum rate of excise duty.

Council Directive 92/83/EEC ('the Directive') sets out EU rules on the structures of excise duty applied to alcohol and alcoholic beverages. Its purpose is to ensure the proper functioning of the internal market. It does so primarily by defining five categories of alcoholic beverages (minimum excise duty rates for each of these categories are defined in a separate piece of legislation, Directive 92/84/EEC), and stipulating rules for when Member States are allowed to apply reduced rates and exemptions. The Directive was identified for evaluation under the Commission's Regulatory Fitness and Performance (REFIT) Programme, and an independent evaluation was carried out in 2015/2016. Based partly on this, the European Commission concluded that overall, the general principles enshrined in the Directive continue to be appropriate, in that they enable adequate collection of excise duties and neutral conditions for competition. However, there are certain issues and problems that cause distortions within the internal market, unnecessary administrative and compliance costs, and legal uncertainty over the treatment of specific products. In December 2016, the Council took note of and broadly agreed with the Commission's conclusions, and invited it to submit to the Council an appropriate legislative proposal in 2017.

#### Objective and scope of this consultation

This consultation is intended to gather the views of EU citizens and stakeholders on policy responses to the problems identified in the preceding evaluation of Directive 92/83/EEC, including objectives to pursue and a set of possible options for the revision of the Directive. For more details on the options and the underlying issues, the following documents are available for review:

- The Report of the European Commission on the REFIT Evaluation of Directive 92/83/EEC;
- The Inception Impact Assessment on a possible proposal of revision of Directive 92/83/EEC.

#### Organisation of this consultation

The consultation questionnaire is divided into six sections, namely:

- section 1 respondent's profile and details;
- section 2 on classification of certain types of alcohol and alcoholic beverages;
- section 3 on reduced rates or exemptions for certain producers and types of alcoholic beverages (namely small / private producers and low-strength beverages);
- section 4 on the excise duty exemptions for denatured alcohol;
- section 5 on the calculation of excise duties on sweetened or flavoured beer using the Plato method;
- final section upload a position paper with additional information.

Each section includes general questions suitable for all type of respondents, and more specific questions for those participants wishing to participate in the more technical aspects of the issues at stake which require more in-depth knowledge of the functioning of Directive 92/83/EEC. A brief outline of the policy problem is provided at the beginning of each section.

### Respondents' details

\* 1 What is your **name** or the name of your organisation?

Please note that you can only fill in the questionnaire if your name and contact details are provided. You can still opt for your answers to remain anonymous when results are published (see next question).

ECHAMP E.E.I.G., Belgium

<b>*</b> 2	Please indicate whether your reply
•	can be published, including <b>your name or that of your organisation</b> (I consent to publication of all information in my contribution and I declare that none of it is under copyrigh restrictions that prevent publication)
0	can be published in an <b>anonymous</b> way (I consent to publication of all information in my contribution except my name/the name of my organisation, and I declare that none of it is under copyright restrictions that prevent publication)
3 F	Please select whether you participate in this consultation as:
0	individual / private capacity
	economic operator
0	industry association
	public authority (national, regional, local)
	non-governmental organisation
	international organisation
	research / academic organisation
	other (please specify)
	Please indicate if your business / organisation is involved in any of the following <b>activities</b> multiple answers possible):
	Production of beer
	Production of wine
	Production of other fermented beverages (e.g. cider, perry, mead)
	Production of intermediate products (e.g. port, sherry)
	Production of spirits (ethyl alcohol)
	Production of fermentable raw materials (e.g. cereals, fruit, vegetables) for the production of alcohol and/or alcoholic beverages
	Production of alcohol for industrial applications (incl. biofuels)
<b>V</b>	Production of industrial products (incl. biofuels) that use alcohol as an input
	Retail / wholesale / distribution of alcoholic beverages
	Retail / wholesale / distribution of alcohol for industrial applications (incl. fuels)
	EU-level industry association

National-level industry associations

other (please specify)

10	In which <b>country</b> are you based?
	Note:EU-level or multinational organisations, please select the first option;
	Organisations and individuals based in one country and operating also in other countries, please select your main country of
	operation.
0	EU-level and/or multinational
	Austria
	Belgium
	Bulgaria
	Croatia
	Cyprus
	Czech Republic
	Denmark
	Estonia
	Finland
	France
	Germany
	Greece
	Hungary
	Ireland
	Italy
	Latvia
	Lithuania
	Luxembourg
	Malta
	Netherlands
	Poland
	Portugal
	Romania
	Slovak Republic
	Slovenia
	Spain
	Sweden
	United Kingdom
	Non-EU country (please specify)

12 If you are replying on behalf of an organisation registered in the **EU Transparency Register**, please kindly provide your ID number here:

If you are not registered yet in this register, please visit: http://ec.europa.eu/transparencyregister/

#### Classification of alcoholic beverages for excise and customs purposes

**Problem outline**: Directive 92/83/EEC classifies alcoholic beverages into five separate tax categories (beer, wine, other fermented beverages, intermediate products, and ethyl alcohol). The definitions of these tax categories make reference to the parallel classification of alcoholic beverages that is used for customs purposes, and is enshrined in the Combined Nomenclature (CN).

The correspondence between the two classification systems (tax and customs) is not always clear and straightforward, especially as concerns products that use new production technologies that did not exist when the Directive was adopted. This may create incentives for the development of new products that exploit the ambiguities of the current classification system so as to pay lower or no taxes, with adverse effect on the functioning of the Single Market, tax revenues, and alcohol consumption control policies. A revision of the current definitions may be required, but this presents numerous challenges, including which criteria can be used to differentiate across products, and how to avoid unintended changes of the tax regime of non-target products.

Secondly, the current classification of certain alcoholic beverages requires they are "entirely of fermented origin". However, this leaves uncertainties on the tax treatment of fermented beverages containing ethyl alcohol as a flavour carrier, and how to distinguish between authorised production practices and additions that may alter the tax category of the products.

Finally, the **revision** process may also include establishing separated excise product codes for wine and other fermented beverages.

13 The current classification rules may create situations where certain new beverages may be placed on the market at a relatively affordable price, due to a favourable tax treatment.
In your opinion is there a general need to reconsider the tax treatment of the following types of products?

	Yes, significantly	Yes, partly	No	Don't know
Ready-to-drink (RTD) products (often referred to as alcopops, pre-mixes etc.)	•	0	0	0
Beer mixes (i.e. mixed with wine, other fermented beverages, or ethyl alcohol	•	0	0	0
Liqueur based on fermented alcohol (or a mix or fermented and distilled alcohol)	0	0	0	0
High strength fermented beverages with characteristics similar to spirits	•	0	0	0
Other problematic products (please specify)	0	0	0	0

15 In your experience, the consumption of the following alcoholic beverages is...?

	Increasing significantly	Increasing moderately	Stable	Decreasing moderately	Decreasing significantly	Don't know
Ready-to-drink (RTD) products, with a spirit base	©	•	©	•	•	•
Ready-to-drink (RTD) products, with a base of fermented alcohol (such as wine, cider, fruit- wine, etc.)		•	©	•		•

Beer mixes (i.e. mixed with wine, other fermented beverages, or ethyl alcohol)	•	•	•	•	•	•
Fermented beverages (cider, perry, mead, fruit- wines etc.)	•	•	•	•	•	•
High- strength fermented beverages (above 15% alc. vol.)	©	•	©	•	•	•

16 In your opinion, which principles should guide a possible revision of the tax classification of alcoholic beverages?

Please express your agreement / disagreement with the following statements

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
In general, new mixed drinks (alcopops, ready-to-drink, pre-mixed cocktails, etc.) should be treated differently from traditional alcoholic beverages	•	©	•	•	•	•

The tax classification should distinguish between ordinary fermented beverages, and fermented beverages that have undergone a process that altered their essential characteristics			•
Certain beverages like cider and perry, should be defined separately (like beer and wine), and not under a generic 'other fermented beverages' label			•

Products intended for young consumers (e. g. sweet, fruit- flavoured, etc.) should be taxed appropriately to	•	•	•	•	•	•
The tax regulation should avoid situations where a beer	©	©	©	•	©	•
mix can be taxed less than an ordinary beer  The tax regulation should avoid that two						
products that are largely equivalent for consumers are taxed very differently because of the distilled or fermented origin of alcohol			•	•	•	•

The tax regulation should avoid situations where a flavoured wine or beer is taxed more heavily just because it contains an alcohol-based flavour	•	•	•	•	•	•
Consumers should be made fully aware of the type and strength of the alcoholic beverages consumed		•	•	•	•	•

The following questions are designed for respondents that are familiar with the classification of alcoholic beverages, the related problems and technical aspects of Directive 92/83/EEC. Non-expert respondents may wish to skip to the next section.

17 The evaluation of the Directive carried out in 2015/16 identified several 'difficult-to-classify' product groups, which are listed below.

In your experience, how often do classification uncertainties and disputes occur with the following classes of products?

	Very frequently	Somewhat frequently	Rarely	Never	I don't know
Ready-to-drink (RTD) products (often referred to as alcopops)	•	•	0	0	•
Medium-strength fermented beverages between 10-15% ABV	•	•	0	0	•
Fermented alcohol pushed to 15-21% ABV industrially, bottled and sold to look like its equivalent, higher rate spirit	•	•	•	©	•
Wine-based drinks to which flavours containing alcohol of distilled origin is added	©	©	0	©	•
Beer mixed with wine or other fermented beverages	0	©	0	0	•

18 The current tax classification system may potentially create **competitive advantages or disadvantages** for different classes of products.

In your opinion, which classes are unduly penalised or favoured by the current tax regime?

	Unduly penalised	Appropriate treatment	Unduly favoured	I don't know
Beer	0	0	0	•
Beer mixes	0	©	0	•
Wine	0	©	0	•
Aromatised wine	0	©	0	•
Fortified wine	0	0	0	•
Cider, perry and other fruit wines (fermented beverages other than wine and beer)	0	©	0	•
Ready-to-drink (alcopops, pre- mixed etc.) with a spirit base	0	0	•	•
Ready-to-drink (alcopops, pre- mixed etc.) based on fermented alcohol	•	•	•	•
Liqueurs based on fermented alcohol	©	0	0	•
Spirits (ethyl alcohol), not including liqueurs with a fermented base	©	©	0	•

19 Please express your opinion on the following possible approaches to address the problems of the definition and classification of alcoholic beverages at the EU level

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Add one or more new product categories, such as a separate category for cider, perry and fruit wine	©	•	©	©	©	•

Clarify the 'correct' criteria for classifying products, for example by incorporating relevant parts of European Court of Justice judgments (in particular on the essential / organoleptic characteristics of products, and their intended use) into the Directive						
Clarify the meaning of the concept of "entirely of fermented origin", so as to define the status of products containing alcohol as a flavour carrier	©	•	•	•	•	•

Amend article 20, so that also products falling under CN code 2206[1] may be taxed as ethyl alcohol, where relevant.  [1] CN code 2206: "Other fermented beverages (for example, cider, perry, mead); mixtures of fermented beverages and mixtures of fermented beverages and nonalcoholic beverages, not elsewhere specified or included".					
Encourage a revision of the scope and definition of CN code 2206	•	•	•	•	•

No change to the Directive, but possible recommendations based on the views of the Indirect Tax Experts Group (ITEG) on the correct classification of specific products			•
Amend the Excise Product Codes (EPC)[1], so as to separate other fermented beverages from wine (both still and sparkling products)  [1] The attribution of Excise Product Code (EPC) is part of the Commission's System for Exchange of Excise Data (SEED).			•

20 In your opinion, what are the **risks** of a possible revision of the tax category of 'other fermented beverages'?

	Very high	High	Moderate	Low	Very low	Don't know
Adverse effects on international trade agreements and exports	•	0	•	0	0	•
Increased disputes and uncertainties (if the new definitions are not robust enough)	•	•	•	0	•	•
Unintended adverse effects on non-target products (such as traditional fermented beverages)	©	0	•	•	0	•
Increased market distortions	0	0	0	0	0	•
Misalignments with other product and sector regulation	0	0	0	0	0	•
Other (please specify)	0	0	0	0	0	•

## 22 In your opinion, what are the **benefits** of a possible revision of the tax category of 'other fermented beverages'?

	Very high	High	Moderate	Low	Very	Don't know
Reduced classification uncertainties and burden	0	0	0	0	0	•
Reduced tax-induced substitution across products	0	0	0	0	0	•
Increased tax revenues	0	0	0	0	0	•
Better enforcement of alcohol control policies (and hence a positive impact on public health)	0	•	©	•	0	•
Other (please specify)	0	0	0	0	0	•

24 In the event a revised taxation would **increase the consumer price** of the following alcoholic beverages, in your opinion what would **the likely reaction of consumers** be?

	No change in the current consumption level	Small reduction in the current consumption level	Large reduction in the current consumption level	Don't know
Ready-to-drink (alcopops, pre-mixes etc.) with a fermented alcohol base	©	©	©	•
Ready-to-drink (alcopops, pre-mixes etc.) with a distilled alcohol base	©	©	©	•
Beer mixes	0	©	©	•
Liqueurs and spirits with a fermented base	©	©	©	•

25 Would you like to add any comments or suggestions on the problems with the classification of alcoholic beverages, and/or how they should be addressed? (max 1000 characters)

1000 character(s) maximum

In Common Customs Tariff only homeopathic medicinal products (HMPs) with an indication are regarded as pharmaceuticals in the sense of position 3004. However, most HMPs do not have an indication; in fact, this is very common in homeopathy in accordance with Article 14 of Directive 2001/83/EU as amended. This should also be respected by the customs.

The financial authority of Hamburg/ Germany outlined, that homeopathic mother tinctures should be assigned to position 1302 19 80 (plant juices, plant extracts, foodstuff) and homeopathic dilutions to position 2208 90 69 (other alcoholic beverages). The authority thereby referred to REGULATION (EU) No 1001/2013 of 4 October 2013 amending Annex I to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff. The case of a company which claimed for grouping of HMPs without indication under position 3004 (remedies) was dismissed. Source: FG Hamburg 4. Senat | 4 K 24/11 |

# Reduced rates or exemptions for certain types or producers of alcoholic beverages

**Problem outline**: Directive 92/83/EEC defines a range of specific circumstances in which Member States may apply reduced rates of excise duty, or even exempt from excise duty, certain alcoholic beverages. In essence, these provisions can be broken down into three separate categories:

**Small producers**: The Directive allows Member States to apply reduced rates to small producers of beer and ethyl alcohol in order to enable them to compete with larger producers, and sets maximum annual production thresholds to determine what constitutes a small producer. The evaluation has suggested that it may be appropriate to extend this advantage to small producers of other beverages (namely wine, other fermented beverages and/or intermediate products).

**Private production**: The Directive stipulates that Member States may exempt from excise duty beer, wine and other fermented beverages produced by a private individual and consumed by the producer, his family or guests, provided no sale is involved. These exemptions are currently not available for the so-called intermediate products (such as port and sherry, etc.) and ethyl alcohol (i.e. spirits).

**Low-strength alcohol**: The Directive allows Member States to apply reduced rates to low-strength beverages in all categories of products; the threshold for what constitutes 'low strength' varies by category. The evaluation found that the actual use of these provisions is limited, and it is not clear what purpose they are intended to serve.

## 26 Do you agree that **small producers** of alcoholic beverages should be subject to **lower excise duty rates** compared to large producers?

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Beer	0	0	0	0	0	•
Wine	0	0	0	0	0	•
Fermented beverages other than wine and beer (e.g. cider, perry, mead)	©	•	©	©	©	•
Intermediate products (e.g. sherry, port etc.)	©	©	©	0	©	•
Ethyl alcohol (i. e. spirits)	0	0	0	0	0	•

27 Do you agree that public authorities should be allowed to exempt the following alcoholic beverages from excise duty if they are produced by a **private individual for his/her own consumption** or that of his family or guests, and not sold?

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Beer	0	0	0	0	0	•
Wine	0	0	0	0	0	•
Fermented beverages other than wine and beer (e.g. cider, perry, mead)	©	©	©	©	©	•
Intermediate products (e.g. sherry, port etc.)	©	©	©	0	0	•
Ethyl alcohol (i. e. spirits)	0	0	0	©	©	•

28 In your experience, **how widespread is the practice of private (non-commercial) distillation** of ethyl alcohol (spirits) in your country?

EU-level stakeholders may reply with reference to the EU region as a whole

- It does not happen
- It happens on a very small scale
- It happens on a modest scale
- It happens on a significant scale
- Don't know

29
Do you agree that alcoholic beverages that are of a lower strength (compared to "typical" beverages in the same category) should **benefit from a reduced excise duty rate**?

	Strongly	Partly agree	Neutral	Partly disagree	Strongly	Don't know
Beer	0	0	0	0	0	•
Wine	0	0	0	0	0	•
Fermented beverages other than wine and beer (e.g. cider, perry, mead)	©	•	©	•	©	•
Intermediate products (e.g. sherry, port etc.)	©	©	©	0	©	•
Ethyl alcohol (i. e. spirits)	©	0	0	0	0	•

30 In your experience, the **consumption of 'low strength' alcoholic beverages** of the following categories is...

	Increasing significantly	Increasing moderately	Stable	Decreasing moderately	Decreasing significantly	Don' t know
Beer	0	©	0	0	0	•
Wine	0	0	0	0	0	•
Fermented beverages other than wine and beer (e.g. cider, perry, mead)	©	©	©	•	•	•
Intermediate products (e. g. sherry, port)	•	•	0	•	•	•
Ethyl alcohol (i.e. spirits)	•	0	0	•	•	•

'Ready-to-drink' beverages (also known as 'alcopops', pre-mixes etc.)		•	•			•
---	--	---	---	--	--	---

The following questions are designed for respondents that are familiar with reduced rates and exemptions, the related problems and technical aspects of Directive 92/83/EEC. Non-expert respondents may wish to skip to the next section

31 In your opinion, **are the thresholds used** in the Directive to define small producers of beer and ethyl alcohol **appropriate**?

Member States are currently allowed to apply lower thresholds

	Much too high	A little too high	Appropriate	A little too low	Much too low	Don't know
Beer: 200,000 hl of beer per year	0	0	0	0	0	•
Ethyl alcohol: 10 hl of pure alcohol per year	0	0	©	0	0	•

32 In your experience, are there issues with the practical implementation of reduced rates for small producers?

In particular, how relevant are the following possible issues?

	Major issue	Moderate issue	Marginal issue	Not an issue	Don't know
Ensuring that the <b>reduced rate</b> in a given Member  State is <b>also applied to imports</b> from other Member  States' small producers	•	•	•	•	•
Ensuring that the reduced rate in a given Member State is also applied to imports from third countries' (non EU) small producers	•	•	•	•	•
Determining whether a company is "independent" and therefore eligible for small producer status	©	©	©	0	•

Please express your opinion on the following possible approaches to extend the application of reduced rates to small producers of alcoholic beverages that are not currently covered and/or to clarify the implementation rules.

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Introduce in the Directive the possibility of reduced excise duty rates for wine.	©	•	•	©	•	•
Introduce in the Directive the possibility of applying reduced excise duty rates for fermented beverages other than wine and beer (e.g. cider, perry, mead).	•	•	•	©	•	•

Introduce in the Directive the possibility of reduced excise duty rates for intermediate products (e.g. sherry, port).	•	•	•	•	•	•
Clarify the rules on cross-border recognition of small producers.	•	•	•	•	•	•
Clarify the rules to establish when a producer can be treated as an 'independent' entity.	•	•	©	•	•	•

To raise the threshold below which distilleries can be considered as 'small'.	©	•	•	©	•	•
No change of the Directive, but the issuance of guidelines on the implementation of the rules on reduced rate for small producers.	•	•	©	©	•	•

34 In your opinion, what would the likely impact of extending optional reduced rates to wine, other fermented beverages (e.g. cider, perry, mead), and intermediate products (e.g. sherry and port) be? (including both intended and unintended)

	Very	Relatively likely	Relatively unlikely	Very unlikely	Don't know
The competitiveness of small producers against big ones would be enhanced	•	•	•	•	•
Member States would use this option to increase (or introduce) taxes on big producers of wine and other fermented beverages	•	•	•	•	•
As concerns public health, the extension of reduced rate would result into more affordable alcoholic beverages placed on the market	•	•	•	•	•

In your opinion, what is the **risk of tax fraud** from alcoholic beverages intended for private / home consumption diverted to retail sale?

	High risk	Moderate risk	Low	No risk	Don't know
Beer	0	0	0	•	0
Wine	0	0	0	•	©
Fermented beverages other than wine and beer (e. g. cider, perry, mead)	©	©	0	•	•
Intermediate products (e.g. sherry, port etc.)	0	0	0	•	0
Ethyl alcohol (i.e. spirits)	0	0	•	0	0

36

Please express your opinion on a **possible extension of optional tax exemptions for private** / **home consumption** to the following categories of alcoholic beverages:

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Intermediate products (e.g. sherry, port)	©	•	©	0	•	0
Ethyl alcohol (i. e. spirits)	0	•	0	0	•	0

37 In your opinion, which of the following (if any) would occur if the exemption for private production were extended to intermediate products and ethyl alcohol?

	Very likely	Relatively likely	Relatively unlikely	Very unlikely	Don't know
Private distillers who currently produce alcohol for home consumption only, and pay excise duties on it, would see their tax and/or administrative burden reduced	•	•	•	•	•
Private distillation of alcohol for home consumption would increase significantly	•	•	•	•	•

From public health perspective, the overall consumption of alcohol would increase	©	©	©	•	©
Commercial distillers in the EU would lose revenue	0	©	•	©	•
Private distillation would increase the health risks for consumers.	0	•	•	©	•
Increase of tax fraud from alcoholic beverages produced for private consumption illegally sold in the country of production	©	©	©	•	©
Increase of tax fraud from alcoholic beverages produced for private consumption illegally sold in another EU Member States	©	©	©	•	©
Toxic or otherwise hazardous by-products would result from private distillation	0	©	©	•	©
Other (please specify)	0	0	0	0	•

## 38 Please specify

200 character(s) maximum

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
To raise the threshold of low-strength beer from 2.8% to 3.5% ABV.	0	©	•	•	•	•
To moderately raise the threshold of <b>low-strength wine</b> (currently 8.5% ABV).	•	©	•	•	•	•
To significantly raise the threshold of <b>low-strength wine</b> (currently 8.5% ABV).	©	©	©	•	•	•
To moderately raise the threshold of low-strength other fermented beverages, like cider and perry (currently 8.5% ABV).	©	©	©	©	©	•

To significantly raise the threshold of low-strength other fermented beverages, like cider and perry (currently 8.5% ABV).					•
To moderately raise the threshold of low-strength intermediate products, like sherry and port (currently 15% ABV).	•	•	•	•	•
To significantly raise the threshold of low-strength intermediate products, like sherry and port (currently 15% ABV).	©	©	©	©	•
To moderately raise the threshold of low-strength ethyl alcohol, i.e. spirits (currently 10% ABV).		©	©	©	•

To significantly raise the threshold of low-strength ethyl alcohol, i.e. spirits (currently 10% ABV).	•	©	©	•	•	•
No change of the Directive, but the issuance of guidelines on the implementation of reduced rate for lowerstrength alcoholic beverages, including a clarification of the policy objectives.	•		•	•	•	•

40 In your opinion, which of the following (if any) is likely to result from a greater adoption of reduced excise duty rates for lower-strength alcoholic beverages?

	Very likely	Relatively likely	Relatively unlikely	Very unlikely	Don't know
It may lead to more choice for consumers.	0	0	0	0	•
It may create incentives for product innovation.	0	0	•	0	•
It may help small producers - because they are more able to target specific niche markets.	0	©	©	©	•
It may help large producers - because they tend to have wider product ranges.	•	©	•	©	•
It may reduce alcohol consumption per capita - because consumers would be encouraged to substitute higher-strength alcoholic beverages with lower-strength ones.	©	©	©	©	•
It may increase alcohol consumption per capita - because more affordable products may eventually encourage consumers to drink more.	©	©	©	©	•

41	Would you like to add <b>any comments or suggestions</b> on the problems with the reduced rates
	for small producers, lower strength alcoholic beverages and exemptions for private production /
	own consumption and/or how they should be resolved?

1000 character(s) maximum

### Exemptions for denatured alcohol

**Problem outline**: Article 27 of the Directive stipulates that Member States shall exempt alcohol produced for certain uses from excise duty – but in order to prevent tax fraud or evasion (i.e. to eliminate the risk that alcohol intended for other purposes is sold as potable alcohol), the alcohol has to be denatured before it is sold.

Denaturation consists in the addition of certain chemical substances that make the alcohol unfit for human consumption. The Directive defines a number of rules concerning the mutual **recognition of denaturing methods**.

However, the evaluation identified significant problems for national administrations and economic operators alike in the application of the rules for the exemptions for the different types of denatured alcohol, how the exemption is granted, and what mutual recognition means in practical terms. The proliferation of **different denaturing methods** (for both "completely denatured" alcohol, which is regulated by article 27.1 (a), and simply "denatured" alcohol, which is the subject of article 27.1 (b)), and the lack of clarity around which methods are recognised where, can create administrative burdens for the customs laboratories in the Member States, as well as barriers to trade and additional costs for economic operators.

- 42 Are you aware of any instances of tax fraud in the EU in the last 10 years involving alcohol sold (explicitly or implicitly) as potable, but containing alcohol that was designated as intended for industrial applications (such as for cosmetics, screen wash, or biofuels), and therefore exempt from excise duty?
- Yes, many instances
- Yes, several instances
- Yes, but only very few instances
- No
- Don't know

43 In your opinion, does the current legal framework (including the mutual recognition of different denaturing methods) facilitate the following:

	To a significant extent	To some extent	To a limited extent	Not at all	Don't know
Fair competition between producers of denatured alcohol in different EU Member States	•	•	•	0	•
Fair competition between users of denatured alcohol in different EU Member States	•	•	•	•	•
Flexibility for users of denatured alcohol who have specific requirements depending on the final product	•	•	•	0	•
Intra-EU trade of denatured alcohol (i.e. imports / exports from one Member State to another)	•	©	•	0	•
The <b>fight against fraud</b> involving denatured alcohol that might be sold as potable	•	©	•	0	©

- 44 Do you believe that the current provisions for the exemption of denatured alcohol should be amended, overhauled or updated?
  - No, the system works well as it is
  - No, but the EU should provide further help with the interpretation of the rules
  - Yes, the EU should make some minor amendments to clarify and update the text of the Directive
- Yes, the EU should undertake a major overhaul of the provisions for the exemption of denatured alcohol
- Don't know

The following questions are designed for respondents that are familiar with the provisions for denatured alcohol, the related problems technical aspects of Directive 92/83/EEC. Non-expert respondents may wish to skip to the next section.

The Directive distinguishes between "completely denatured" alcohol (article 27.1 (a)) and "denatured" alcohol (article 27.1 (b)). The original purpose of this distinction was to create a system of mutual recognition to allow alcohol denatured using methods deemed sufficiently robust by all Member States to move freely across EU territory, while also affording Member States the flexibility to allow other (usually less "invasive") methods for industries that have specific requirements.

45 Do you agree with the following statements?

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
There is a need for different rules for denatured alcohol for different industrial applications	©	•	•	•	•	•
The difference between the two categories currently defined in the Directive is clear	•	•	•	•	•	•
The implications of the two categories regarding the production and movement of denatured alcohol are clear	©	•	©	•	•	•
The distinction between the two categories currently defined in the Directive is useful in practice	©	•	•	•	•	•

46 Have you, the company you represent, and/or a company that you have done business with or are in direct contact with, ever experienced any of the following issues related to completely denatured alcohol (as regulated by article 27.1 (a) of the Directive)?

	Yes, on many occasions	Yes, on a few occasions	Yes, once or twice	Never	Don't know
We / they have incurred additional costs because alcohol recognised as "completely denatured" in one EU Member State was not recognised as such in another Member State	©	©	•	•	•
We / they have experienced delays because alcohol recognised as "completely denatured" in one EU Member State was eventually, but not immediately recognised as such in another Member State	•	•	•	•	•
We / they have chosen not to import / export completely denatured alcohol from / to another EU Member State because of the risk it would not be recognised as such	©	©	•	•	•
We / they have chosen to purchase completely denatured alcohol from a third (non-EU) country, rather than from an EU Member State, because it was subject to less strict rules	©	©	•	•	•

We / they have experienced problems concerning the safety and/or robustness of one or more of the national formulations for completely denatured alcohol that are currently recognised		•	•	•	•
--	--	---	---	---	---

Most Member States have recently communicated the "Eurodenaturant" formulation for completely denatured alcohol consisting of 1 litre of isopropyl alcohol (the chemical analytical marker), 1 litre of methyl ethyl ketone (the smelling agent), and 1 gram of denatomium benzoate (the tasting agent) per hectolitre of absolute ethanol.

Do you agree with the following statements concerning this specific formulation?

	Strongly	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
The formulation is sufficiently easy to detect for consumers	•	•	•	0	©	0
The formulation is sufficiently easy to detect for tax / customs authorities	•	•	•	0	•	•
The formulation is sufficiently difficult to reverse	©	•	•	0	©	0
The cost of the formulation is proportionate to its effectiveness	•	•	•	©	•	•
On balance, the formulation is appropriate for general use across the EU	©	©	•	©	©	0

48

Some Member States have communicated other formulations instead of or in addition to the one described in the previous question.

Do you agree with the following statements on the continued use of certain national denaturing formulations for completely denatured alcohol, alongside the "Eurodenaturant"?

NB: Some of the remaining national formulations consist of differing concentrations of some of the ingredients of the Eurodenaturant as defined above; others contain different denaturing agents.

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
All Member States have to recognise and exempt from excise duty alcohol denatured anywhere in the EU, using any of the national formulations	©	•	•	•	•	•
National formulations for completely denatured alcohol are important to protect the interests of national producers	©	•	•	•	•	•

All of the remaining national formulations are 'safe' (i.e. sufficiently robust to protect consumers and prevent tax fraud)	©	•	•	•	•	•
If national formulations continue to be used, a certain level of uncertainty regarding mutual recognition remains	©	•	•	•	•	•

49 Have you, the company you represent, and/or a company that you have done business with or are in direct contact with, ever experienced any of the following issues related to denatured alcohol as regulated by article 27.1 (b) of the Directive?

	Yes, on many occasions	Yes, on a few occasions	Yes, once or twice	Never	Don't know
We / they have incurred additional costs to understand the legal situation as regards the applicable rules and procedures for denatured alcohol when imported / exported from / to another EU Member State	•	•	•	•	•

We / they have incurred additional costs / administrative burdens to ensure that alcohol denatured using a formulation accepted in one EU Member State was also recognised as such in another Member State (e.g. to apply for a special authorisation)	•	•	•	•	
We / they have had to pay excise duty on denatured alcohol, because a Member State did not recognise the procedure by which it was denatured in another Member State	•	•	•	•	•
We / they have chosen not to import / export alcohol denatured using a formulation accepted in one EU Member State from / to another EU Member State because of the risk it would not be accepted as such	©	©	•	©	•
We / they have encountered different interpretations in practice among Member States regarding what constitutes a final "product" that can be exempted, e.g. whether it needs to be in its final packaging or can be moved in bulk	©	©	•	•	•

We / they have encountered different interpretations in practice among Member States regarding what constitutes "used for the manufacture of", e.g. whether denatured alcohol used for cleaning or disinfection can be exempted	•	©	•	•	•
We / they have encountered different interpretations among Member States regarding the correct tax treatment and/or denaturing process for alcohol to be used as an ingredient for transport and /or heating fuel		©	•		•

Do you agree with the following statements regarding the competent authorities' ability and capacity to detect and/or combat tax fraud involving denatured alcohol in accordance with article 27.1 (b)?

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
All Member States only authorise denaturing methods that are robust enough to effectively eliminate or reduce the risk of tax fraud	©	©	•	•	•	•

The large number of different denaturing formulations authorised in the different EU Member States makes it difficult for customs and /or tax authorities to effectively detect and/or		©	•	©	©	©
combat tax fraud involving denatured alcohol  All Member States supervise the production, use and movement of denatured alcohol in a way that is	©	•	•	•	•	•
robust enough to effectively eliminate or reduce the risk of tax fraud						

The fact that Member States use different approaches to control the production, use and movement of alcohol for different purposes makes it difficult for customs and /or tax authorities to effectively detect and/or combat tax fraud involving denatured alcohol		•		

51 Overall, how would you describe the economic and/or social impacts of the problems with the exemptions for denatured alcohol (if any) on the following stakeholders and issues?

	Significant impact	Moderate impact	Minor impact	No impact	Don't know
Costs for economic operators resulting from a lack of legal certainty regarding the recognition of denaturing methods by the Member States	©	•	•	•	•
Unfair competition, which affects the relative price of, demand for, and /or cost of producing denatured alcohol in different Member States	©	•	©	©	•
Lost tax revenue due to tax fraud involving denatured alcohol	©	•	0	0	0
Negative health effects from denatured alcohol that ends up being sold and drunk as potable alcohol	©	•	©	©	•
Other (please specify)	0	•	0	0	0

### 52 Please specify

200 character(s) maximum

It should be clarified expressis verbis in tax laws that the term "medicinal products" follows the regulatory of pharmaceutical products, i. e. in the sense of Directive 2001/83/EU.

Please express your opinion on the following possible approaches to address the problems with the exemption of denatured alcohol.

	Strongly	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Agree on the "Euro" denaturant (in whichever concentration) as the only authorised formulation under article 27.1 (a), and the eventual elimination of all national procedures	©		•	•	•	•

Insist on full mutual recognition of completely denatured alcohol, to ensure that all Member States recognise all procedures notified by all Member States, irrespectively of where the alcohol was produced / denatured			•			
--	--	--	---	--	--	--

Accept limited mutual recognition of completely denatured alcohol, meaning that each Member State is only obliged to recognise alcohol denatured using its own national method(s) (which may include the "Euro" denaturant)			•			
---	--	--	---	--	--	--

Develop a common list of formulations that are authorised for denatured alcohol under 27.1 (b) across all Member States, distinguishing between different end- uses / sectors	•	•	•	•	•	•
Clarify that the terms "used for the manufacture of" in article 27.1 (b) only refers to the direct use, and does not include indirect uses such as cleaning, disinfection or other adjacent activities			•			

Clarify that the terms "any product not for human consumption" in article 27.1 (b) requires that the product in question is a recognisable finished product, and held out for sale as such		•	•	•	©	•
--	--	---	---	---	---	---

Fund capacity / confidence building measures (e.g. training, exchanges, visits) between national tax and /or customs authorities to enhance their understanding of each others' approaches to supervising the production and movement of denatured alcohol			•			
--	--	--	---	--	--	--

Define conditions for the Member States to apply Articles 30 and 31 of Directive 2008/118/EC for the movement of products of low fiscal risk to certain types of denatured alcohol	•		•	•	•	•
--	---	--	---	---	---	---

Depart from the current distinction between "completely denatured" and (partly) "denatured" alcohol; and instead distinguish between different end uses (e.g.: (1) sale to the public; (2) industrial applications; (3) use in biofuels)			•			
--	--	--	---	--	--	--

54 Would you like to **add any comments or suggestions** on the problems with the exemptions for denatured alcohol, and/or how they should be addressed?

1000 character(s) maximum

# Calculation of excise duties on sweetened / flavoured beer using the Plato method

**Problem outline:** The Directive gives Member States the choice between two methods for establishing the excise duty on beer – by reference to either the actual alcoholic strength by volume (ABV), or to the degrees Plato of the finished product. In practice, around half of the Member States use ABV, and around half use Plato. In general, this does not result in any negative consequences, and the evaluation of the Directive concluded that the current provisions on establishing duty for beer remain appropriate.

However, the way in which the excise duties on sweetened or flavoured beers are calculated in countries using the Plato method is inconsistent. In some cases, the term "finished product" is interpreted to include the sugar or flavouring that is added, which can affect the degrees Plato but not the alcoholic content of the product. Economic operators have argued that this approach technically wrong, and can lead to unfair competition among them.

Since this is a purely technical issue, all questions in this section require familiarity with the Plato method, the related problems technical aspects of Directive 92/83/EEC. Non-expert respondents may wish to skip to the final section.

- 55 In your opinion, how should the term "finished product" in Article 3.1 of the Directive be interpreted when it comes to establishing the degrees Plato of sweetened or flavoured beer?
- With reference to the "base beer", i.e. based on the fermentable extract not including the flavourings that are added after the fermentation process
- With reference to the "end product", i.e. based on the real extract of the finished product including the flavourings added after the fermentation process
- Don't know

Please express your opinion on the following possible approaches to the issue of excise duty applicable to sweetened or flavoured beer measured by degree Plato.

	Strongly agree	Partly agree	Neutral	Partly disagree	Strongly disagree	Don't know
Clarify article 3 (1) of the Directive, with respect to the interpretation of "finished products" definition	©	©	•	•	•	•
No change to the Directive, but guidance on the 'correct' approach to measure degree Plato of sweetened /flavoured beer	©	©	•	•	•	•

57	Would you like to add any comments or suggestions on the problems with the calculation of
	excise duties on sweetened / flavoured beer using the Plato method, and/or how they should be
	addressed?
